

HOW TO INSTALL CISCO ANYCONNECT VPN

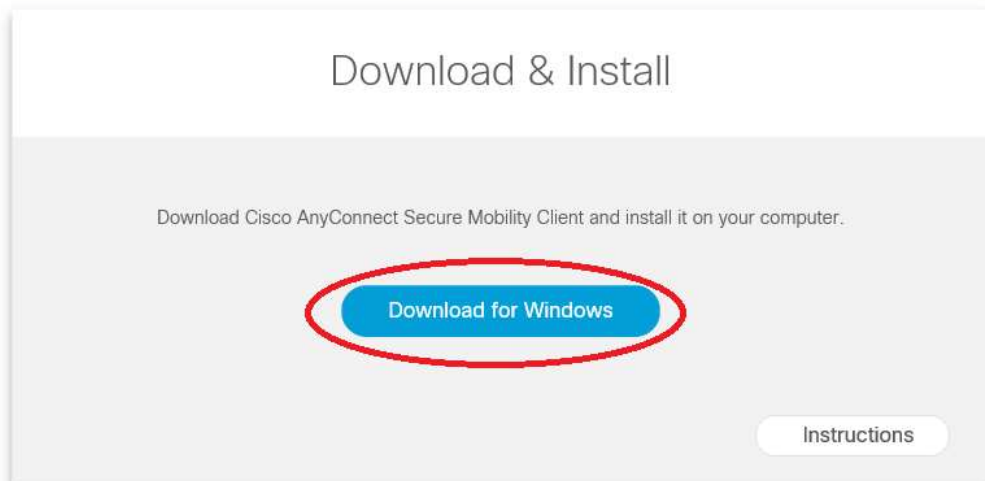

- 1) Go to <https://vpn.mveca.org>

You may receive a SSL Certificate error, just click Continue. Select the proper Group from the drop down entry. Type in your user name and password. This is the same as your Cherwell or USAS-DW login. Then click Logon

A screenshot of a web-based login window titled "Logon". The window has a light gray header bar with a small circular icon on the left. Below the header, there are three input fields: a dropdown menu labeled "Group" with "Anyconnect_RA" selected, a text box labeled "Username", and a text box labeled "Password". Below these fields is a button labeled "Logon".

- 2) The download window will be presented. Click "Download for Windows" or "Download for MAC"

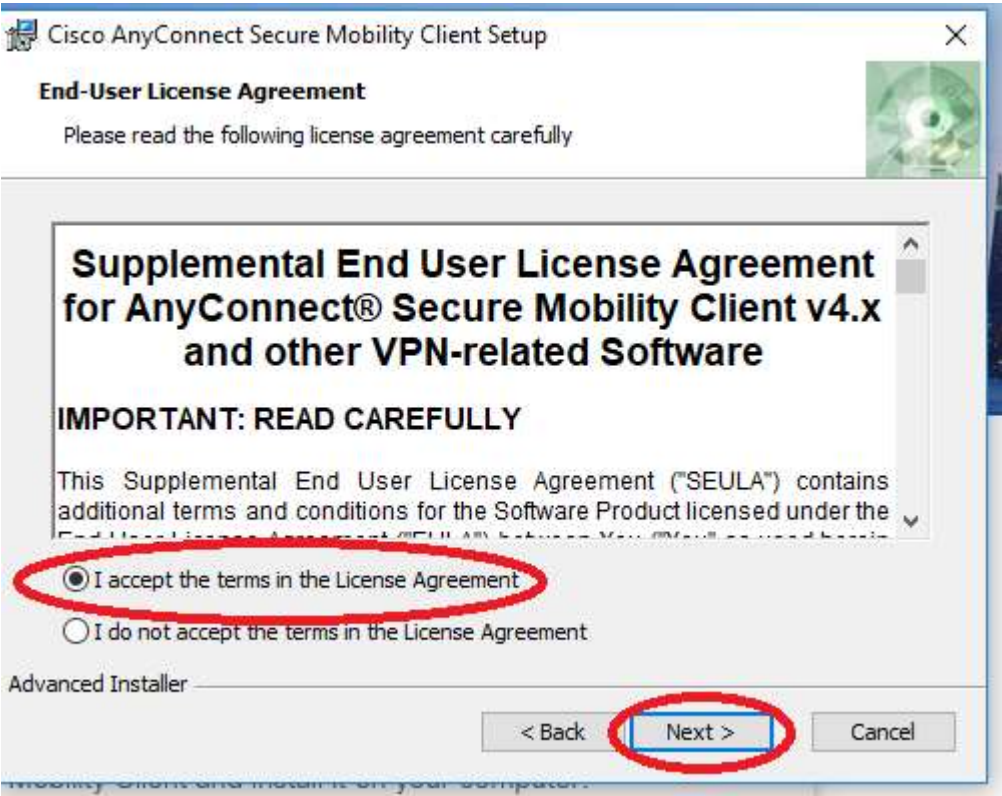

3) From the pop-up at the bottom of the screen choose "Run"

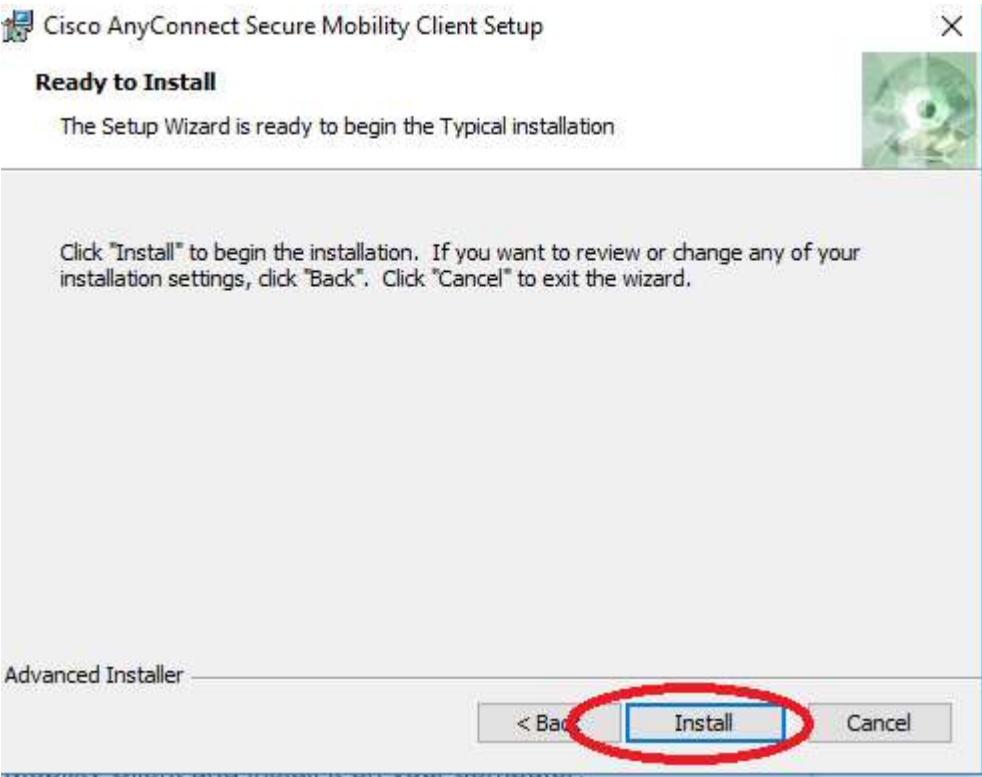

4) On the Welcome dialog click Next

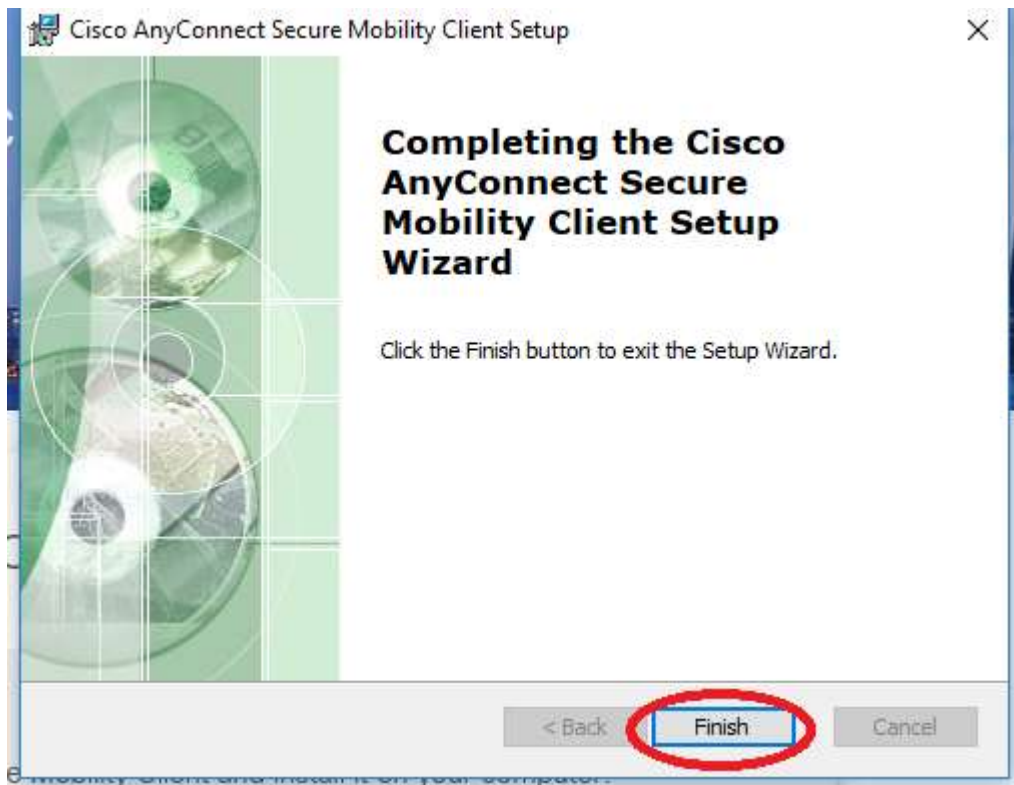

5) On the License Agreement dialog select “I accept the terms...” and click Next

6) On the Ready to Install dialog click Install.

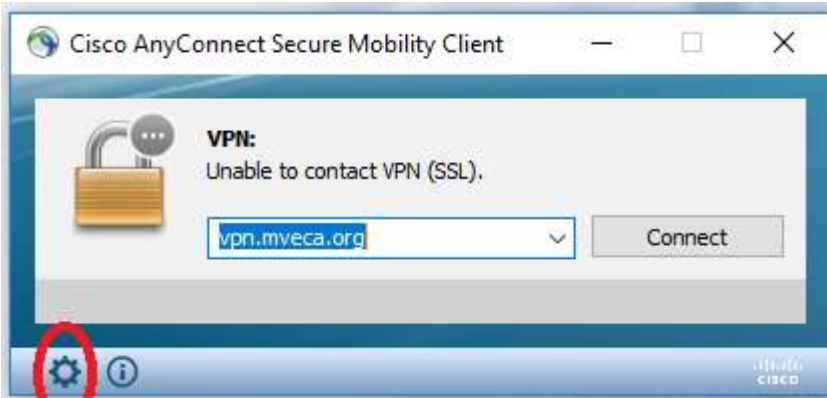

7) Click Finish

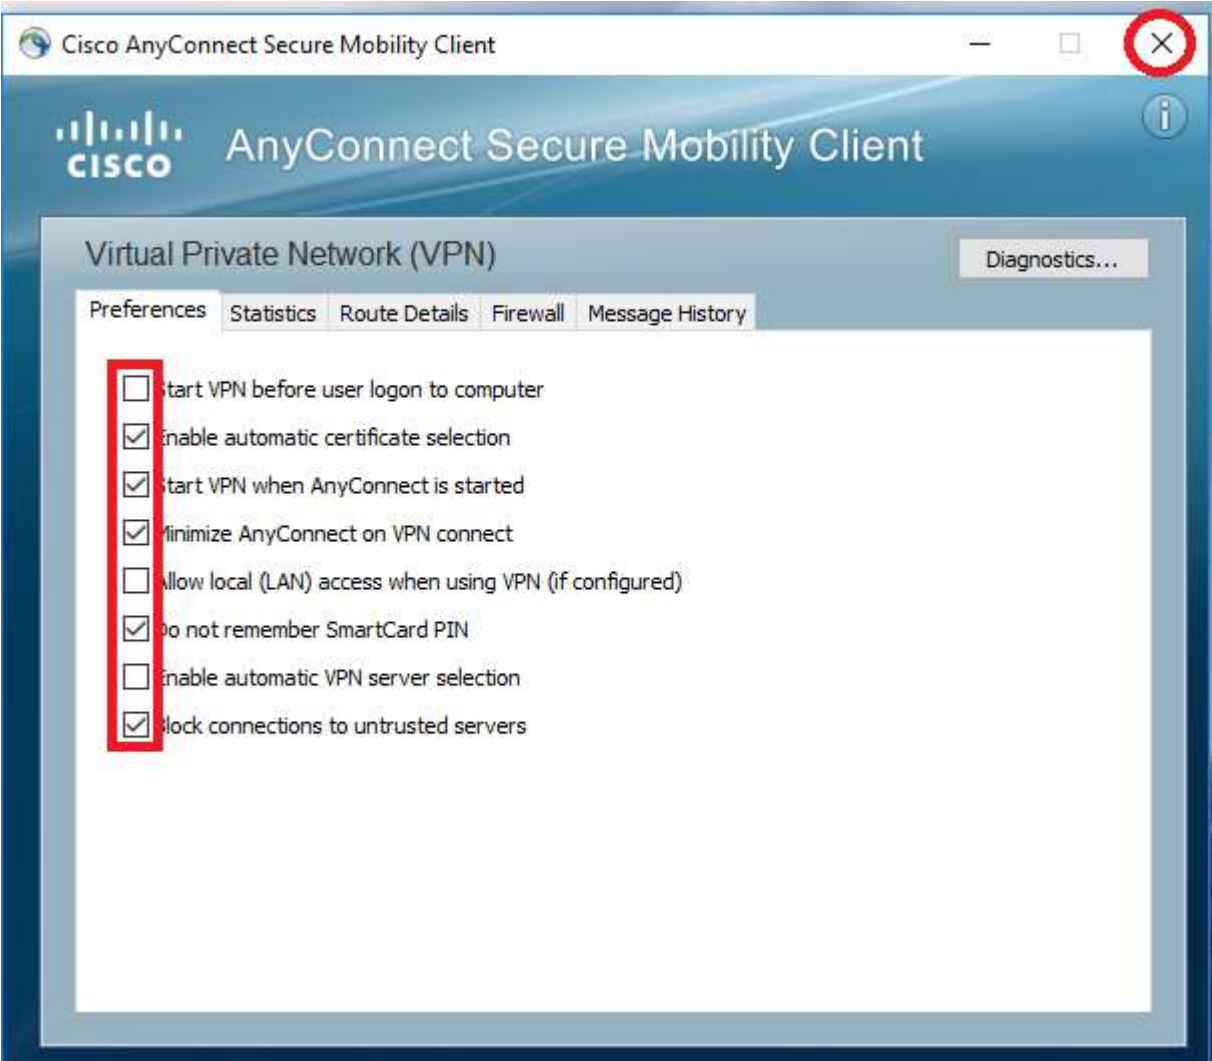

8) Once the software is installed you should see an icon the taskbar tray (bottom right). Or in the Menu go to the Cisco folder and select Cisco AnyConnect Secure Mobility Client

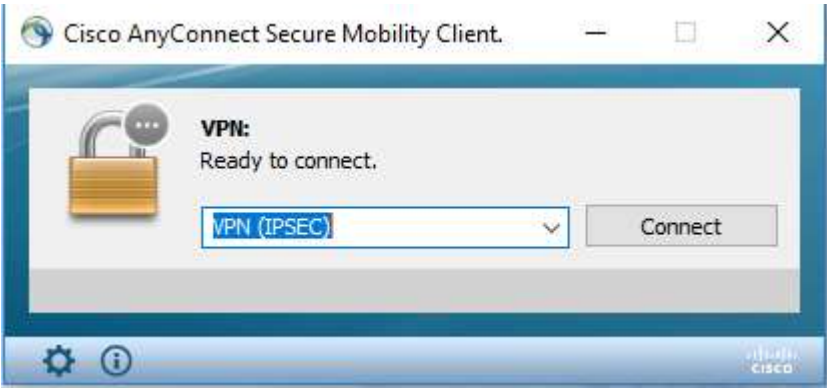

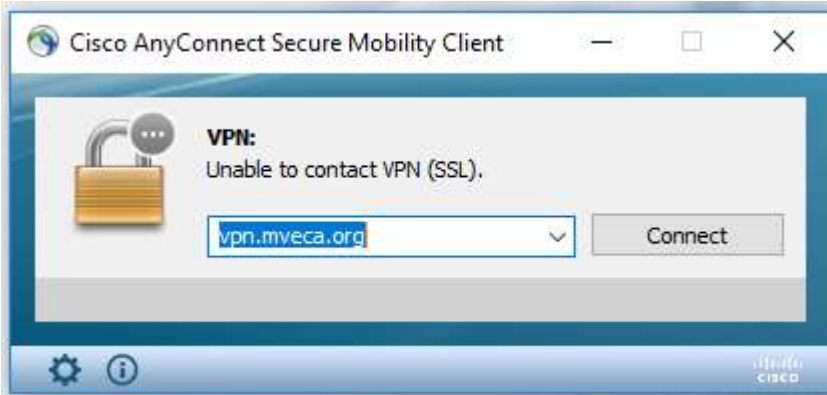

9) On the connection dialog click on the gear in the lower left corner.

10) Now select the Preferences tab and put checkmarks in the boxes shown below. Then click the X in the upper right corner to close the window.

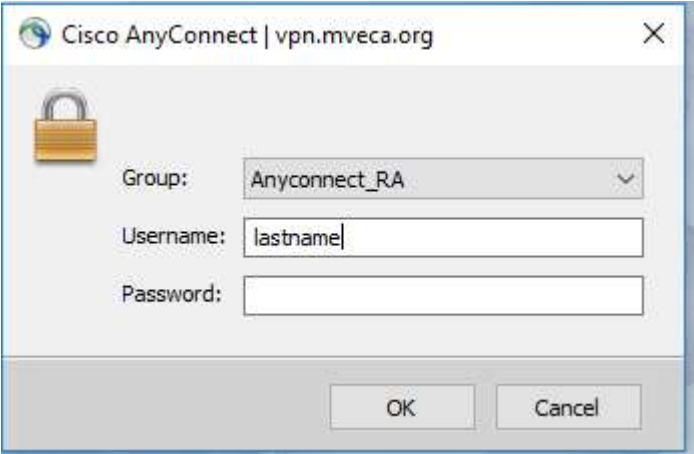

- 11) Enter the URL for the VPN (vpn.mveca.org) and click Connect. NOTE: In the future the URL will show VPN (SSL) or VPN (IPSEC) in which case you should choose VPN (IPSEC) (see below)

Once you disconnect from the VPN, to re-connect either go thru All Programs or click on the Anyconnect icon in the taskbar tray.

- 12) On the Logon dialog under the Group make sure it is "Anyconnect_RA"
Once you enter your username/password and click OK. (Note: your username may be pre-filled for you)

13) Once you are through with the VPN click on the icon in the tray in the lower right corner of the screen. Then click Disconnect.
